Mathematik 7c Winkel messen, zeichnen, berechnen

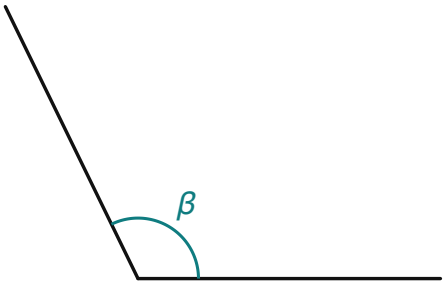

Lösung

○ leicht ◐ mittel ● schwer

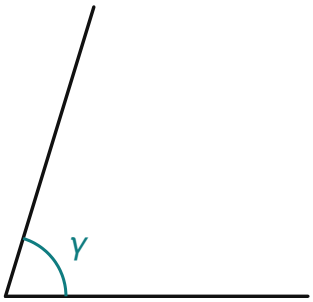

Nr. 1 ○ Art schätzen, dann messen. Zu kurz? Schenkel verlängern.

Art **spitz** α = **38** °

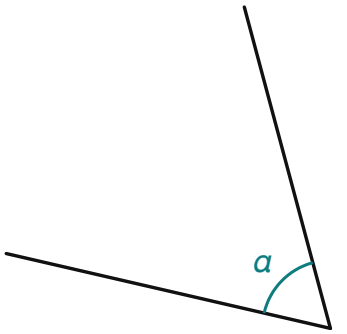

Art **stumpf** β = **116** °

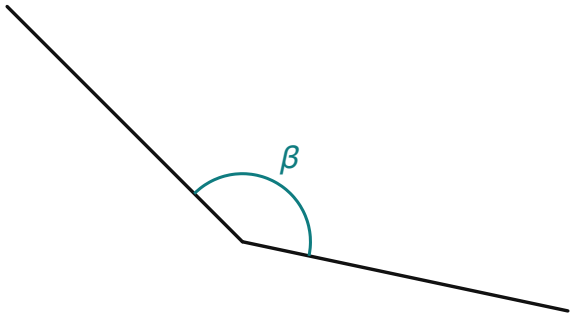

Art **spitz** γ = **73** °

Nr. 2 ◐ Art schätzen, dann messen. Die Schenkel liegen schräg.

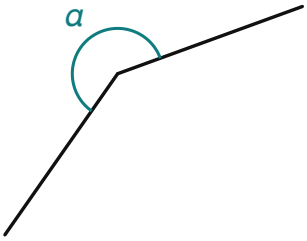

Art **spitz** α = **62** °

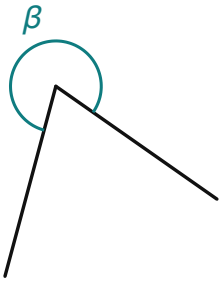

Art **stumpf** β = **147** °

Nr. 3 ● Miss den Rest und rechne 360° minus Rest.

Rest = **145** °

α = **215** °

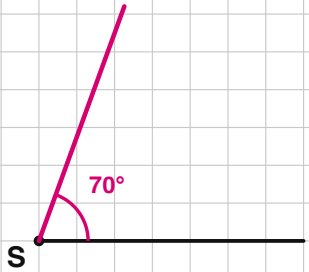

Rest = **70** °

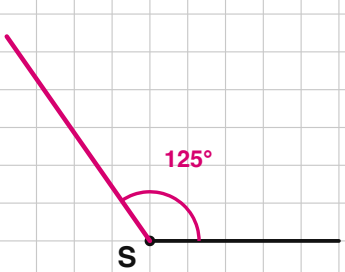

β = **290** °

Nr. 4 ○ Zeichne die Winkel gegen den Uhrzeigersinn. Beschrifte sie.

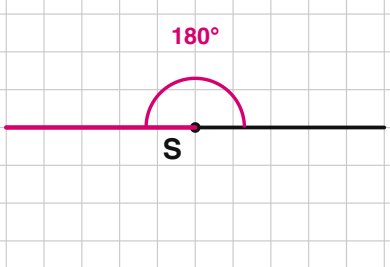

a) α = 70°

b) α = 125°

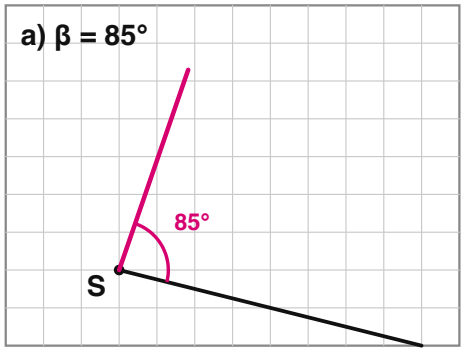

c) α = 180°

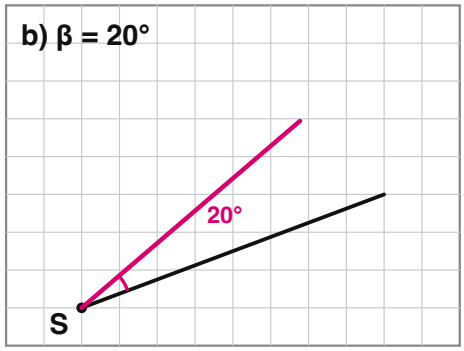

Nr. 5 ◐ Zeichne die Winkel. Der Schenkel liegt schräg, das Geodreieck auch.

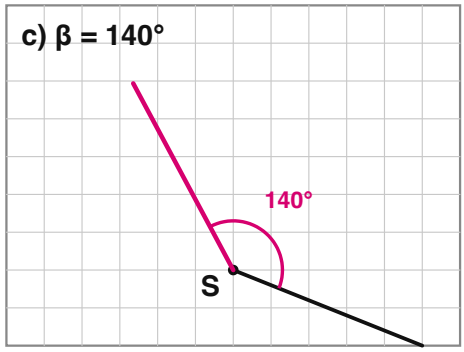

a) β = 85°

b) β = 20°

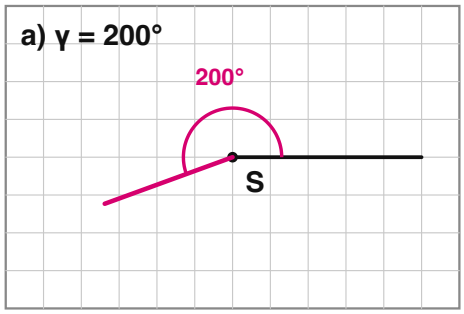

c) β = 140°

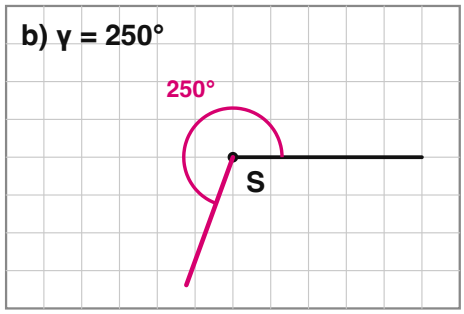

Nr. 6 ● Zeichne die überstumpfen Winkel. Tipp: mit dem Rest oder mit 180°.

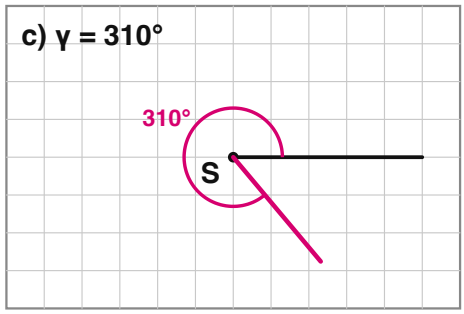

a) γ = 200°

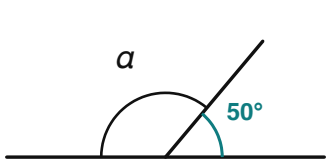

b) γ = 250°

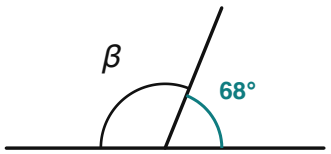

c) γ = 310°

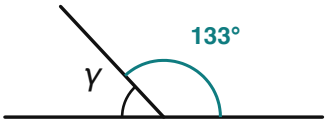

Nr. 7 ○ Berechne mit dem gestreckten Winkel. Notiere die Rechnung.

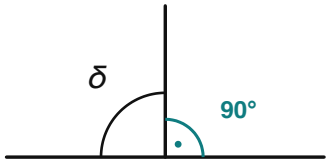

α = 180° – 50° = 130°

β = 180° – 68° = 112°

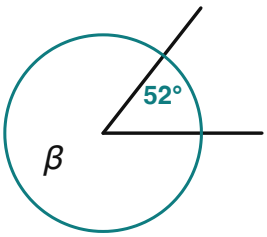

γ = 180° – 133° = 47°

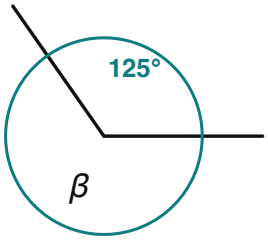

δ = 180° – 90° = 90°

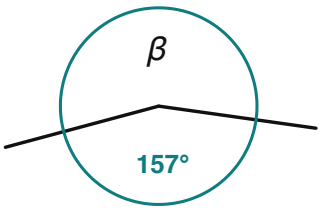

Nr. 8 ◐ Berechne mit dem Vollwinkel. Notiere die Rechnung.

β = 360° – 52° = 308°

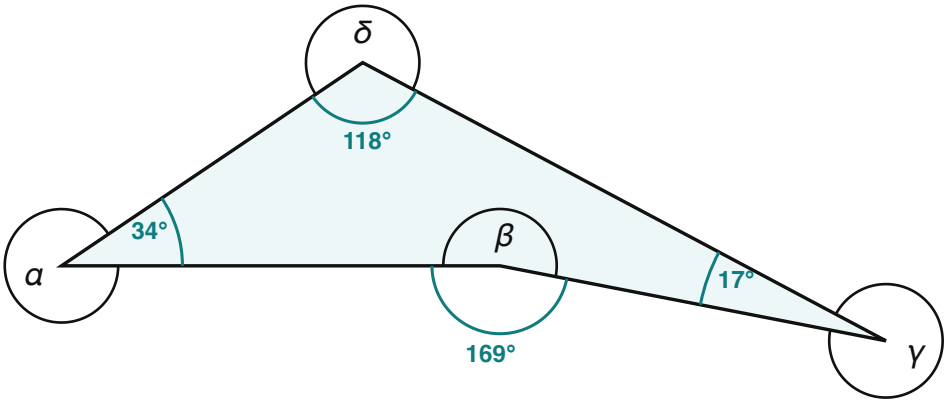

β = 360° – 125° = 235°

β = 360° – 157° = 203°

Nr. 9 ● Berechne α, β, γ und δ mit dem Vollwinkel.

α = 360° – 34° = 326°

β = 360° – 169° = 191°

γ = 360° – 17° = 343°

δ = 360° – 118° = 242°
